

The Swivel Arm System offers the possibility of constant air supply for pneumatic tools within a semicircular range of work having the stapler always ready to hand.

This affords maximum ergonomic working conditions for the operator. The Swivel Arm System consists of a vertical and a horizontal profile to guarantee the lifting capacity on the entire extension length.

For wall mounting the profile can be fixed over two angles. For table mounting the profile can be fixed directly at the table-top.

wall mounting: 2 + 3 m length  
table mounting 1 + 2 m length

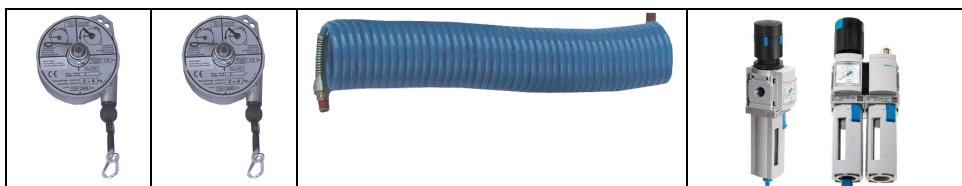

Technical Data	
Material	profile
Swivel arm length	up to 3 metres max.(1,8 m table mounting)
Carrying capacity	max. 35 Kilo

#### Available versions:

- A.) Complete Swivel Arm for **wall mounting** with slide shoe for suspension of pneumatic stapling tools.
- B.) Alternatively for **table mounting** for mounting at table-top.  
Height 180 cm

Order No.:	Length of Swivel Arm:
<b>SCHWENK 10 T</b>	<b>1,0 metres table mounting</b>
<b>SCHWENK 20 T</b>	<b>2,0 metres table mounting</b>
<b>SCHWENK 20 W</b>	<b>2,0 metres wall mounting</b>
<b>SCHWENK 30 W</b>	<b>3,0 metres wall mounting</b>

Accessories:	max. Rope length
B 2/4 Balancer (weight compensator) 2 - 4 KG	2.50 m
B 6/8 Balancer (weight compensator) 6-8- 10 KG	2.50 m
DS 75 Spiral hose, extended length	4 m
